

Organics

Alfa Aesar, now part of Thermo Fisher Scientific, is a leading manufacturer and supplier of research chemicals with a long and proud tradition of producing organic compounds for the drug discovery and agrochemical markets.

Our comprehensive range of organic molecules allows our customers to conduct a broad range of synthetic chemistry methodologies and enables them to facilitate their research and development projects.

The following list of categories provides some examples of the broad range of organic synthesis products available:

General lab work essentials

- Solvents
- Organic acids, bases and salts
- Deuterated solvents

Functional reagents

- Organometallic compounds
- Halogenating agents
- Oxidizing and reducing agents
- Coupling reagents
- Alkylating reagents
- Ligands
- Protection and deprotection reagents
- Ionic liquids
- Phase transfer catalysts
- Silylating agents and silanes

Building blocks

- Heterocycles
- Boronic acids
- Alkanes
- Alkenes
- Acetylenes
- Aldehydes
- Hydroxyls
- Ethers
- Ketones
- Organo halides
- Carboxylic acids and derivatives
- Sulfonyl chlorides
- Sulfonamides
- Chiral compounds
